

HEATING, VENTILATION & AIR CONDITIONING

Condensing Boiler

What are they?

A condensing boiler is usually fuelled by gas or oil and is more efficient than a conventional boiler.

How do they work?

All boilers lose some heat in the hot gases that escape up the flue. However, condensing boilers have a bigger heat exchanger allowing it to recover more heat which makes it more energy efficient.

Benefits

Heating your home and hot water can account for up to 60% of your energy bills. A well-maintained condensing boiler can therefore have a big impact on reducing your energy consumption and CO₂ emissions.

What are the potential savings?

According to the Energy Saving Trust, the potential annual savings, depending on your old boiler rating could be:

> **£105 - £300**

What are the typical costs?

If you were to have this measure installed without Green Deal, this would typically cost you upfront:

> **£600 - £2,000**

HEATING, VENTILATION & AIR CONDITIONING >

Condensing Boiler

How can I benefit from Green Deal?

By taking advantage of the Green Deal, you can receive finance to have these energy-saving improvements installed in your home at no full upfront cost. The savings you make will always be greater than the cost of repayments on the measures installed.

Will it be suitable for my home?

Condensing boilers will be suitable for most properties using a mains gas supply. Properties with no mains supply will need alternative heating systems. Your NICEIC Green Deal Advisor will provide you with impartial advice on the measures most suitable for your home.

Where and how is it installed?

Condensing boilers will be typically installed in the same location as your old boiler.

What do I need to do next?

Step 1

Get an energy assessment report completed on your home by an NICEIC Green Deal Advisor.

Step 2

Present your report to a Green Deal Provider who will assess whether to approve the finance on the measures you wish to install and coordinate your Green Deal plan.

Step 3

If approved, the Green Deal Provider can arrange for the installation to be carried out by an NICEIC Green Deal Installer.

Step 4

Once installed, your Green Deal payments will be included as instalments in your energy bill. This will be arranged for you by your Green Deal Provider and your energy supplier.
